Implant Services

I partner with Astra Tech whenever available for implant abutments. I can easily share 3D images with the Dentist to aid in abutment design. Some implant systems have exclusive rights to abutment restorations; therefore, their system will be used.

I certify that all restorations are fabricated in my laboratory at 12731 Research Blvd., C302, Austin, Texas with the exception of some implant abutments and Zirconia copings which are fabricated in the USA.

I have all major precision articulators in my lab including SAM2, SAM3, Panadent (magnetic mount), Denar Combi, Hanau, and Whip Mix.
